Improved badging and credentialing across the catchment area by enabling leaders to teach and train associates

Assisted market leaders in securing connected devices by organizing reporting and creating a system for store champions to follow

EDUCATION

Southern New Hampshire University
- Bachelor of Science in Computer Science, EXP July 2024

SOFT SKILLS

As a well-rounded professional, I possess strong communication, adaptability, and leadership qualities, enabling me to connect with diverse individuals and excel in dynamic settings. My teamwork and stress management skills allow me to guide others and maintain a positive attitude in high-pressure situations.

TECHNICAL SKILLS

My technical expertise includes programming languages like Python, Java, and C++, data analysis tools such as SQL, Excel, and Tableau, and project management methodologies like Agile and Scrum. As a web developer, I use HTML, CSS, and JavaScript, and my understanding of cybersecurity best practices ensures secure networks and systems.
